Average Monthly Bill (\$)	\$52,947.41	\$53,374.20	\$52,654.31	\$53,939.82

*This compares electricity costs for an average large commercial customer in the CleanPowerSF/PG&E service area with an average monthly demand of 632 kW and an average monthly usage of 257,101 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on E-19S rate schedules for PG&E's and CleanPowerSF's published rates as of May 15, 2020.

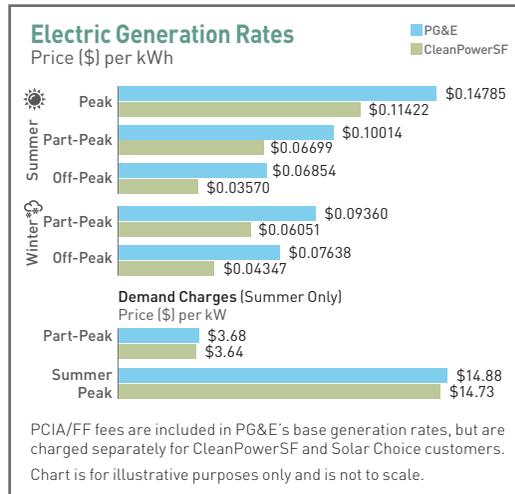

**Solar Choice is a limited program offering available to customers that elect PG&E as their electric service provider. Eligibility is limited and subject to restrictions on customer type, customer size, rate schedule, enrollment level and program caps. For more information please refer to pge.com/solarchoice.

Generation Rate is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

PG&E Delivery Rate is a charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage, but is charged equally to both CleanPowerSF and PG&E customers.

PG&E PCIA/FF represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's above-market costs for generation resources acquired prior to a customer's switch to a third-party electric generation provider. The PCIA also applies to PG&E customers that elect to take service under PG&E's optional Solar Choice program. PG&E acts as a collection agent for the FF surcharge, which is levied by the California Public Utilities Commission (CPUC) on behalf of cities and counties in PG&E's service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers.
